

GREEN FUTURE

NEWSLETTER 7: LAUNCH OF THE GREEN
FUTURE PILOTING

MAY 2024

CONTENT

An overview of the Green Future Piloting

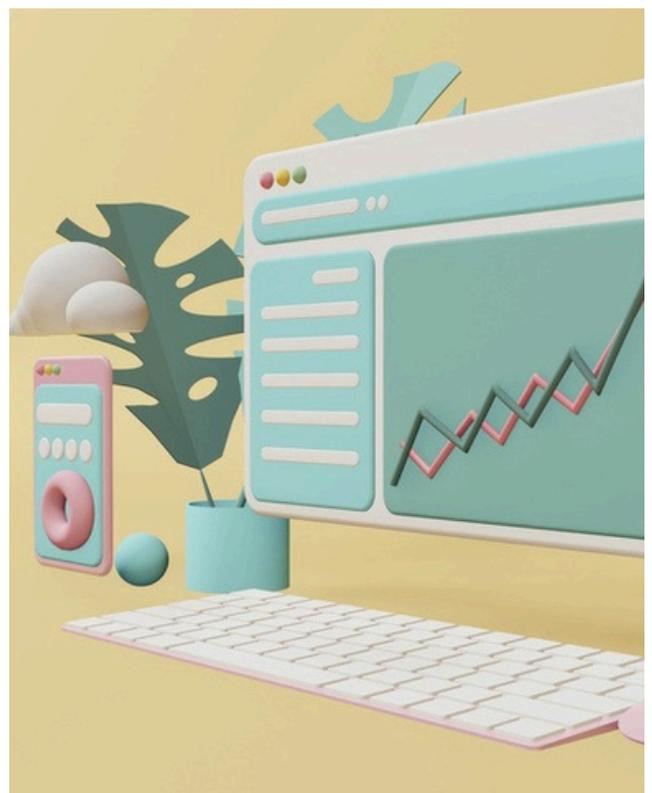

The aims and objectives of the pilot testing.

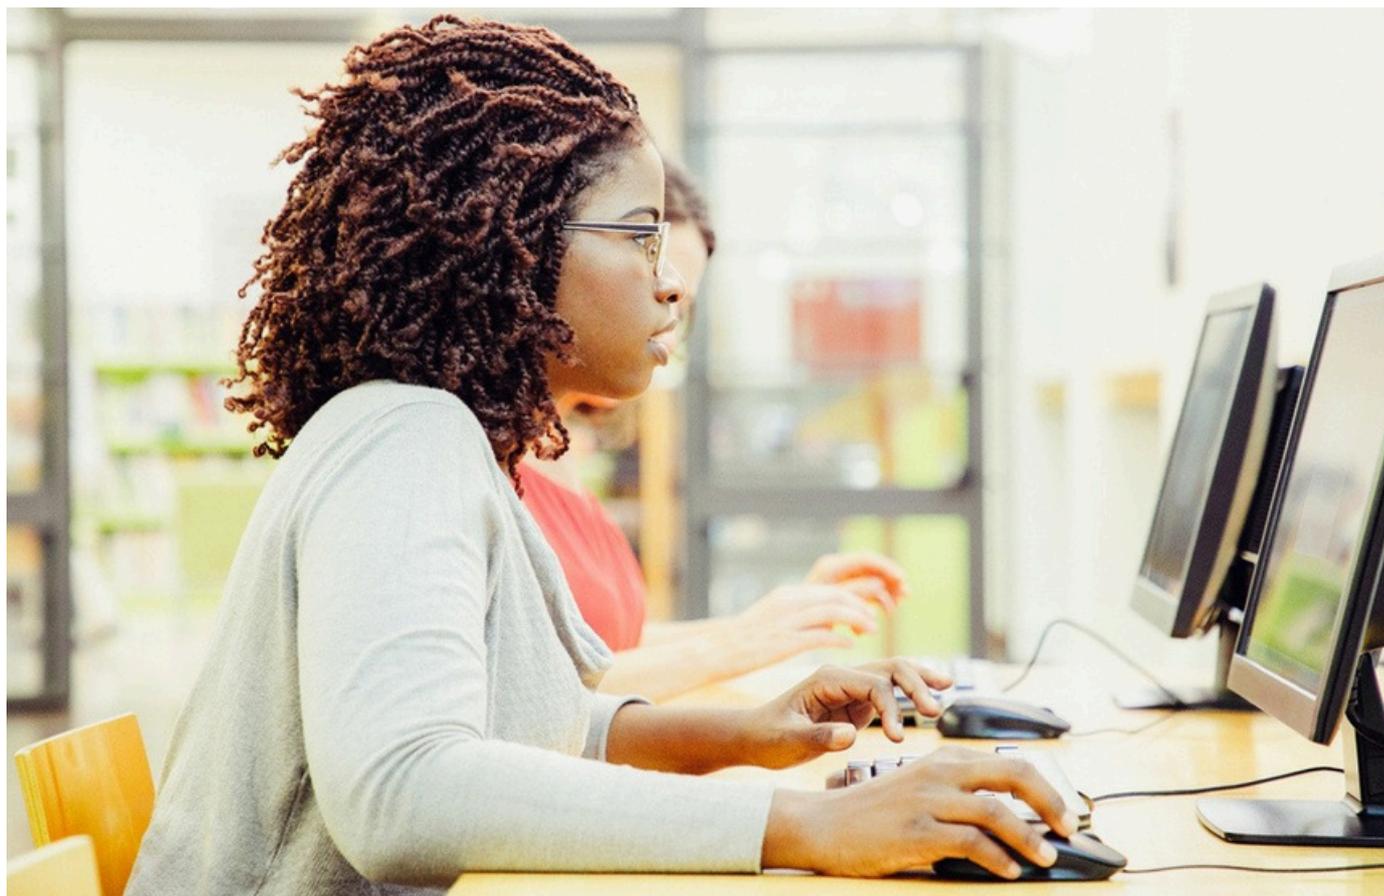

How to participate

“GREEN FUTURE ONLINE PLATFORM TO IMPLEMENT INCUBATION PROGRAMMES FOR PERSONS AT RISK OF EXCLUSION

We developed a specific digital environment to support sustainable incubation processes.

Our team worked closely with partners practices and needs, bringing direct added values to activities they are running to support the creation and development of new and sustainable businesses.

THE GREEN FUTURE PILOT TESTING

The main objective piloting the Green Future platform is to assess the effectiveness, usability and impact of the platform in achieving its environmental sustainability goals.

We will involve Mentors and Entrepreneur and pilot users of the tool, to evaluate the usability and user experience on the Green Future Project website, and to identify areas for improvement in terms of navigation, design, content, and functionality.

CALL FOR PARTICIPATION

If you are an **ENTREPRENEUR** or **MENTOR** in these areas, then you can participate in the pilot testing

You can follow the link below and make an account to explore the project resources, and test the online incubation functionality of the **business plan**.
